Tighter project schedules. Higher customer expectations. Availability of skilled resources at the right place and the right time. Ever rising costs.

Today, most IT companies are faced with these challenges. Some of these challenges are linked, and a small change can make a large impact on the overall success of the project. One of the key factors for successful implementation and delivery of software projects within schedule and budgeted costs, is to have a development team with the right experience and skills. To recruit, train, and make a software professional contribute quickly to a project is time consuming, and at times expensive.

The Consulting Services Group at ObjectOrb gives your project and business the power to access experienced, trained technology specialists who can contribute to your project as soon as they are on board.

Consulting Services Group: Differentiators

Unlike other resource augmentation services, ObjectOrb differentiates by providing its fully trained staff that meets your technical and project needs. Our aim is to reduce your costs, and enable you to access highly skilled resources for both short-term and long-term engagements.

ObjectOrb has been offering corporate training services since 1998. We have conducted more than 100 corporate programs on topics like CORBA, OOAD/UML, Design Patterns, J2EE, Requirements Management, Estimation Techniques for leading IT companies in India and abroad too.

Some of our training customers include Infosys, Wipro, Satyam, Lucent, Motorola, Subex, CrimsonLogic, Philips, Broadcom, Novell, SAP Labs, Accenture, Pivotal Corporation, and Oracle among others.

We will train each consultant from our team in technologies relevant to you. So, whenever our consultants are assigned to your projects, they can be effective within a very short duration.

Company Background

ObjectOrb Technologies is a Bangalore-based, Healthcare IT Products and Services company. Our mission is to deliver better healthcare through innovative use of technology. Since our inception in 1998, we have worked on several large projects for our customers in the U.S., Europe and the Middle East.

In 2003, we set up a products division to cater to the needs of the healthcare industry. In June 2005, we have launched a contract management solution in the U.S. In December 2005, we have released an 'Any database, Any format' Integration solution currently catering the needs of the Saudi Arabian market. This product hits the U.S market very shortly with significant features and competencies. In November 2006, we have released a health insurance portal for the Indian market.

We achieved ISO 9001:2000 certification in 2002 and were appraised at CMMI level 5 in 2006
